WELCOME LETTER

The Lebanese Order of Pharmacists is proud to announce the program of the 24th Annual Congress under the theme: "Advancing the Pharmacist's Role: Together We Make a Difference".

The scientific program involves several sections that cover all the emerging roles of the pharmacist to better serve our dear profession, thriving to lead in health care and become more patient- than product-oriented. The program also promotes the application of scientific knowledge in real practice.

According to the World Health Organization, a Seven Stars pharmacist is a caregiver, decision maker, communicator, manager, leader, teacher and a life-long learner. On top of it, a modern pharmacist is also a researcher involved in academia and public health issues and a health care major player involved in medication therapy management (MTM) and safety.

I wish you fruitful moments attending our rich program, animated by international and national renowned speakers.

Dr. Georges Sili
